

Corporate Health & Well-Being

**BUILDING
A HEALTHIER
WORKFORCE**

HELPING YOU TO BUILD A HEALTHIER WORKFORCE

With over 40 years' experience in the global diagnostic industry, Randox promote preventative healthcare through timely and accurate health testing.

At Randox, we understand that everyone has unique health needs. Our corporate health programmes are tailored to benefit your workplace and provide valuable insights into key health areas.

The largest diagnostic company
in the UK and Ireland

Over 20 health
clinics nationwide

Measuring over
350 data points

**In 2021, 149.3 million working
days were lost to sickness absence.**

Play a role in helping your employees to feel better about themselves and their health with a corporate health package. **Speak to an account manager today to take the first steps to better health.**

Our Packages

Package Overview

 Vital	 Insight	 Executive
 Female Health & Fertility		 Bespoke

Vital

Understand your health baseline by reviewing vital areas, including diabetes, heart health, and body composition analysis.

Insight

With the Insight health package, proactively monitor and improve your health. Measure up to 150 data points across key health areas, including hormonal, nutritional, and digestive health.

Fasting and Non-Fasting Optional

Executive

The comprehensive health package is curated to deliver real-time insights on your current health and future health risks. The Executive measures up to 350 data points relating to key health areas.

You will receive a personalised report containing important information about your hormonal, nutritional, heart, stress, and sexual health. The report also includes tests for tumor-associated markers, autoimmune conditions, genetic testing for inherited conditions, and an optional ECG.

Female Health & Fertility

Having knowledge about female health is essential as it can have an impact on important areas like the heart, thyroid, nutrition, and bone health. To ensure women are always informed, there are various health checks available for every stage of their life.

Female Hormone

Measures eight key data points to identify if an imbalance could be affecting fertility, weight, and energy levels.

Menopause

By measuring over 30 data points, you can discover how menopause or perimenopause may increase the risk of conditions such as diabetes and osteoporosis.

Fertility Health

Over 45 data points are measured, including reproductive hormone levels, thyroid and ovarian reserve.

Polycystic Ovary Syndrome (PCOS)

Measures 45 data points to help identify potential risks associated with PCOS.

Anti-Mullerian Hormone (AMH)

Learn more about your ovarian reserve and if it's normal for your age.

How It Works

Build Your Package

1

Collaborate with an account manager to create a comprehensive health package for your employees.

Simple Sample Collection Process

2

Samples can be collected at any of our clinics nationwide. Alternatively, schedule a visit from our mobile testing team to your office location at your preferred time and date.

In-Clinic

Off-Site

Hybrid

Personalised Health Data for Staff

3

Employees receive personalised health reports via email, which can also be accessed through the Randox Health app. Printed reports can be requested.

Workforce Analytics Delivered to Employer

4

After conducting a thorough analysis, receive a comprehensive report summarising key findings to assist you in taking action to help improve the health of your workforce.

Powerful Personalised Health Data

With the Radox Health app, users can easily access their personalised health report, providing a breakdown of their results, and the next steps to help track and improve their health data.

Workforce Analytics

Employers receive a detailed report that outlines employee results, helping you to take action to build a healthier workforce. The report summarises health trends and provides a snapshot of employee well-being.

68% 
of your staff are lacking in **Vitamin D** which can be associated with cardiovascular diseases, diabetes, cancers, autoimmune diseases, dementia, depression, osteoporosis and respiratory illnesses.

79% 
of your staff have **low HDL Cholesterol** which is closely associated with increased risk for cardiovascular disease. Associated signs include stroke, heart attack, premature coronary artery disease, and peripheral polyneuropathy.

24% 
of your staff have a **high Cardiovascular Risk Score** which is closely associated with being at high risk of cardiovascular disease (CVD), that is heart, stroke or blood vessel disease, in the next ten years.

Example of health trends shown in result report.

Other Services

Vaccines

Protect your employees with our corporate vaccinations. With flexible appointment options, taking care of your team has never been easier.

Cold/Flu – Help to reduce flu-related absences with a seasonal flu jab.

HPV – Protect against several strains of the Human Papilloma Virus with an HPV Vaccine, which is available in two doses.

Travel – Offer your employees the opportunity to get vaccinated before traveling to countries with potential health risks.

In-Clinic

Off-Site

Hybrid

IV Therapy

Our IV therapies and booster shots provide long-lasting benefits that will leave your team feeling revitalised, hydrated, and energised. You can choose from a selection of IV therapies to help deliver the vitamins, nutrients, electrolytes, minerals, and antioxidants your body requires.

Additionally, we offer five vitamin injections, including Vitamin C and Vitamin B12, to help you embark on your path to better health and well-being.
