Web based, access via a URL

Works on a laptop, monitor or smartphone

Identify vision or prescription changes

**SIMPLE AND EASY TO USE
FROM ANY DEVICE**

"38% of UK adults have not been for an eye test in the last 2 years"

"1 in 5 haven't had an eye test in 5 years"

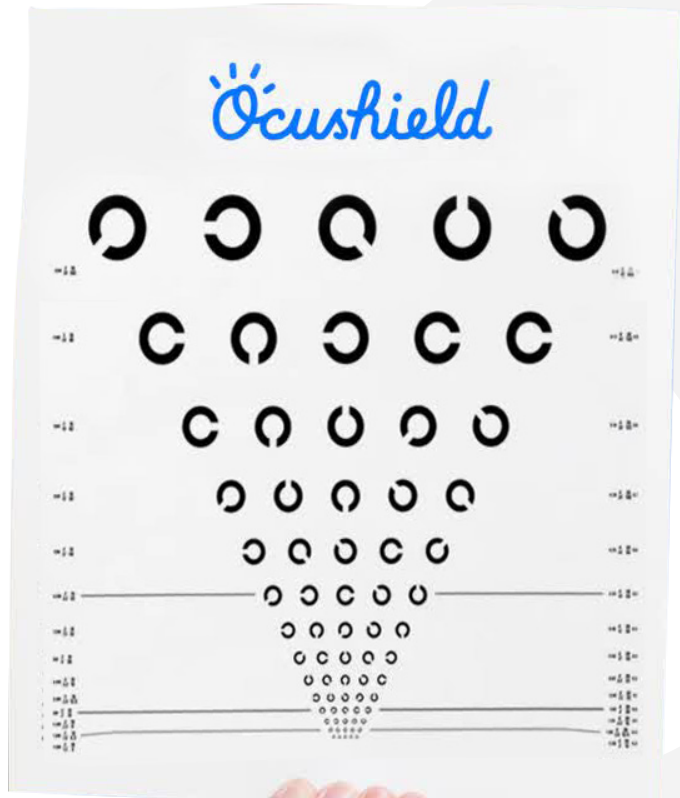

"1 in 10 have never had an eye test*"

THE PROBLEM

In spite of companies offering funded eye tests as well as offerings from the NHS and local authorities, many adults are not getting their eyes tested as often as they should. Reasons can include

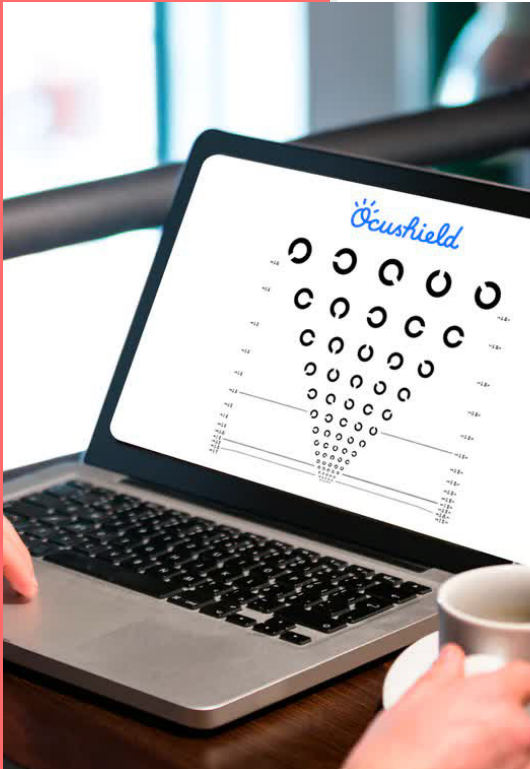

- Nervousness of the process and equipment
- Finding the time
- Not a priority
- Simply forgetting

65% of working adults experience eye strain and discomfort after prolonged use of VDU/PC screens and more than 20% suffer from Headaches**. As a result, employees may find it difficult to focus and productivity can suffer.

THE SOLUTION

Ocushield's online eye screening test has been created to be simple, fast and accurate. The user interface is easy to follow and requires minimal input but provides accurate data on eye health.

From home or in the office, easily find out if you are suffering from any visual problems which may need further intervention or support. Imagine the Ocushield eye screening test as a precursor to a full eye examination, providing your optometrist guidance on any areas which may need extra investigation if something is wrong.

A full test report is generated with practical guidance on next steps.

FAQ's

How does the test work?

The test has been created by optometrists who have digitised common ophthalmic testing methods, accessible via a web URL.

What is tested?

Screening checks for any visual changes, colour vision abnormalities, muscle balance issues, visual field defects, depth perception difficulties, as well as changes in existing prescriptions.

What information does an employer get?

Employers will be provided with uptake and engagement data. Test results are issued to the individual complying with GDPR regulations.

Does this work globally?

Yes, the Ocushield online remote eye screening test is scalable and accessible across the globe.

Can employers customise the test?

Yes, addition of logos, call to actions or using a unique employer URL for the tool can be developed for a nominal fee.

LICENSING OPTIONS

Single use

Issue single licenses for users for one time use

Unlimited Use

Allow users unlimited eye screening access. Useful to regularly check for changes in vision throughout the year.

Unlimited use with family access

A great perk for employees! Allow unlimited access for employees immediate family including children for one fixed cost.

Our eyes work harder than they ever used to, that's why supporting employees with the first step of an eye screening process is key to identify abnormalities and encourage employees to get their eyes tested.

We believe, prevention is better than cure and a workforce that can see - can produce work that benefits the company and in turn their own performance.

Go above the minimum to help beat screen fatigued eyes.
